---

1 Connecting the cords to back of controller

Main power cord

Back of controller

Handpiece

Align each ● marks and insert the plug.

Foot switch

---

2 Remove the test horn

2-1
Turn the protector sleeve and remove it.

2-2
Remove the test horn using attached two wrenches.

---

3 Tool installation

A
Electroplated diamond file (One piece tool)

Tighten firmly using attached two wrenches

B
Ceramic fiber grindstone

1. Attach the tip holder to the handpiece and tighten firmly with two wrenches.
2. Insert the ceramic fiber grindstone into the tip holder(①) and tighten the set screw firmly with the attached hexagon wrench(②).

Common to A and B
Insert the protector sleeve into the handpiece and turn it to install it.

*Always make sure that the protector sleeve is installed before using the handpiece, as using the handpiece without it may result in burns.
